CLEANROOM PASS-THRU

Where contamination control is critically important, a pass-thru system is essential. Models are available in dozens of sizes and in many different materials.

Complete ease of operation is but one of the outstanding features. Designed with simplicity in mind either door is easily actuated with slight hand or thumb pressure.

Either the mechanical or electrical interlock allows for positive latching. Only one door can be opened at a time. This feature guarantees the integrity of the clean room since the room is under positive pressure all air evacuation is

outward. BSL-3/4 seals available as an option.

CONSTRUCTION MATERIALS AVAILABLE

- Standard laminated
- Steel (painted or unpainted)
- Stainless 304/316 steel
- Plastic

DOORS:

The doors are polished Plexiglass. Safety plate or amber (gold color) are also available on special order.

HARDWARE:

Unit is hinged and framed in anodized aluminum with inserted vinyl bulb seal.

INTERLOCK:

The mechanical or electrically operated interlock system has a specially concealed latch that allows for only one door to be opened at a time. This guarantees the integrity of the clean room.

- Mechanical Interlock
- Electrical Interlock

INSTALLATION:

The pass-thru is flush to the clean room wall side. Insert the pass-thru into a rough wall opening and hold in place with anodized aluminum or stainless steel angle.

SPECIFICATIONS

OPTIONS:

- **Fire Rated**
- Solid 304/316 stainless steel construction
- Adjustable stainless steel shelves (solid or perforated)
- 304/316 stainless steel laminated interior
- Fluorescent/UV lights
- Polypropylene construction (other plastics available)
- Aluminum construction
- Talk-thru installed in doors
- Multiple doors
- Inert gas purge

CHAPTER 2

**CART PASS THRU
MODEL# PT3648-54 SS/MI
PT2448-36 SS/MI**

GENERAL:

The Cart Pass Thru shall provide an air lock for optimum retention and prevention of cross contamination of the controlled atmosphere within the clean room area.

CONSTRUCTION:

The Cart Pass Thru's general construction shall appear architecturally pleasing, and the engineering, workmanship, and materials shall be of the highest quality.

The Cart Pass Thru shall be constructed of 16-ga., type 304, stainless steel with a #4 polished finish, double wall construction. The doors to be constructed of 20-ga., type 304, stainless steel with 1/4" thick acrylic glazing, bullet hinge and quarter turn handles. Unit supplied with sloped top to be field installed. Cart Pass Thru to include mechanical door interlock system.

INSTALLATION:

The opening in the wall should be 1/4" larger than the o.d. size of the unit. Place the unit into the opening and position as required. Attach the angle trim, (provided) with the unit, to both sides of the wall, this will hold the unit into the wall and will finish off the rough opening. The Cart Pass Thru is now ready for use.

Note: the Cart Pass Thru is shipped with a squaring board inside unit to keep the unit square during shipment. This board should be kept in place, until after unit is installed.

MAINTENANCE:

Standard Pass Thru with mechanical interlocks requires virtually **no** maintenance. After years of dependable service customer need only check that all hardware is tightened.

PARTS LIST • MODEL# CPT3648-54 SS/MI and #CPT2448-36/MI/SS

PART DESCRIPTION	PART NO.	MFG.	QTY.

* Latch Assembly part numbers shown are supplied with a short pawl. To order latches with a long pawl, as shown above, change last digit of part number to a 2. **Example :** 92-21-112

Installation

1. Prepare panel.
2. Assemble hardware as shown.
3. Move pawl assembly to desired grip position and tighten jam nuts against pawl assembly with 2 wrenches.

NOTE: For 3-point latching, install rods on studs before tightening jam nuts.

Product Strength Guidelines

(To assist in your product selection; samples are available for your evaluation.)
Maximum working load:
 Short pawl 400 N (90 lbs.)
 Long pawl 200 N (45 lbs.)
Average ultimate load:
 Short pawl 1440 N (325 lbs.)
 Long pawl 840 N (190 lbs.)

CLOSE WINDOW

CLOSE WINDOW

Southco® Hinges

Adjustable Compression

- Adjustable compression for the hinge side of the door
- Allows the door to be removed from the hinge side
- Accommodates application and gasket variances
- Front and concealed mounting
- Door can also be permanently installed

How it works:

These hinges provide 5 mm (.20 in) of total adjustment.

Front-mount hinge

Thread size	Part number
No. 10 or M5	96-10-572 •

Concealed-mount hinge

Thread size	Part number
10-32 UNF-2B	96-10-570 •
M5x0.8 6H	96-50-570 •

Hinges
Lift-off

Product Strength Guidelines

(To assist in your product selection; samples are available for your evaluation.)

RADIAL

Maximum working load = 1000 N (225 lbs.)
Average ultimate load = 1550 N (350 lbs.)

AXIAL

Maximum working load = 2200 N (500 lbs.)
Average ultimate load = 14,000 N (3200 lbs.)

Maximum recommended tightening torque of mounting screws: 4.5 N•m (40 in.-lbs.)

To assure lift-off capability, the pin of the fixed knuckles must point up when installed on frame.

For non-lift-off mounting, the pin of one fixed knuckle must point in a direction opposite the other(s) when mounted to frame. One of the fixed knuckles must be installed *AFTER* door is hung.

These hinges can be mounted on either side of door.

Concealed-mount hinge

Screw length = frame thickness plus 7.5 mm (.30 in.)

Front-mount hinge

No. 10 or M5 socket head cap screws must be used to attach front-mount hinge assemblies.

Mounting screws are *not* supplied.

NOTES: Either **F** Dimension or **G** dimension must be less than 19.8 (.78) for the door to open a full 180°. * Dimension will vary as † dimension is adjusted through its range. The door and frame design must allow for this variation.

Material and Finish

KNUCKLES and BASE: Die-cast zinc, black powder coated.
WASHER: Nylon, black.
HOLE PLUG: Thermoplastic Elastomer, black.
CLAMPING SCREW: Stainless steel, black oxide.
CLAMPING NUT: Low carbon steel, zinc plate, chromate plus coricone sealer.

Installation and Adjustment

- Adjustable knuckles must always be mounted to the door.
- Front mounted adjustable knuckles must be disassembled before installation.
- Use hole plugs to deter unnecessary adjustment and enhance appearance. Hole plugs press into screw sockets with thumb pressure.
- To adjust hinges: Pivot adjustable knuckle with respect to the base to desired position, then tighten knuckle in place with a 4 mm or (5/32) hex wrench. Recommended tightening torque of clamping screw is 4.5 N•m (40 in.-lbs.)
